# WHAT IS PIRNAR ULTIMUM?

*Pirnar Ultimium* is the best first impression. And for those who are leaving, the best last impression.

It is a long sigh of admiration. Amazing forms, stunningly sturdy and strong. Something you touch with enjoyment every day. It is your first contact with the home that makes you enormously proud.

It is made for people who are aware of their excellence. An absolute technological masterpiece for those who know no compromise. Those who dare to sparkle where others don't. Those who dare to be all they can be.

**Unique.**

ADMIRER

*To be one's self, and unafraid  
whether right or wrong, is more  
admirable than the easy cowardice  
of surrender to conformity.*

— IRVING WALLACE

**Nobody admires mediocrity.**

We admire those who rise above the crowd and shine as an example. Those who accomplish what no one else has. Those who inspire with their courage and go where others do not dare. There are not many such people.

We admire what is rare. Beauty, for instance. In our world, where we are daily besieged with the new, real beauty is still more difficult to find than a gold coin in the street.

*Pirnar Ultimum* is an entrance that draws sighs of admiration.

No other entrance is trimmed with such innovative forms. They seize the attention with their different surface levels as well as with their astonishingly clean and perfect smoothness. Every handle is a masterpiece of its own, at night arousing more sighs of admiration as it lights up. The fourfold glazing offers the possibility for endless play with patterns and textures.

Touch it. Feel the impeccability of all the details, carefully assembled by hand into a charming whole.

Open it. Feel the power and solidity hiding in the thickest door on the market – which just the same opens as lightly as a feather. *Pirnar Ultimum* protects you against heat loss better than any other, as it is the best heat insulated aluminium door in the world.

People who visit you will not only admire its beauty. They will admire your home. And even more.

**They will admire you.**

# SELF-CONFIDENTLY

*We gain strength, and courage, and confidence by each experience in which we really stop to look fear in the face.*

— ELEANOR ROOSEVELT

**Self-confidence opens all doors.**

But we are not born with it. We built self-confidence every day. When we surpass ourselves. When we remember what we are good at and everything we have created. And also when we create an environment where we feel safe. Also at home.

*Pirnar Ultimium* is a door that exudes self-confidence.

BURGLARY RESISTANT  
CERTIFICATE

**RC2  
(WK2)**

IFT ROSENHEIM

*Pirnar* doors with security class RC2 (WK2) has been granted from the German research institute IFT Rosenheim. Doors are protected with special hardware parts and lock. A P4A penetration resistant glass pane offers additional protection. Using burglary resistant doors with tested security class RC2 (WK2) will provide you with very good burglary protection.

The extraordinary 14-centimetre thick door panel gives the feeling of castle-like protection and safety. The door panel, because of its thickness and special construction, is exceptionally rigid and firm. This is enhanced by a combination of the thickest profiles by the company Schüco, the masterfully perfect and precise hand work, and an innovative way of constructing the elements. Here, *Pirnar Ultimium* doors simply have no competition.

All the doors in the series can be built for the anti-burglary protection class RC2 (WK2). Standard equipment includes a 3-point safety lock with two massive hooks and three massive and powerful hinges.

Every time you open the door, you will be aware of how strong they are. *Pirnar Ultimium* is a symbol of safety. It is also a symbol of the self-confidence of its owner. It tells people in the outside world that here lives a person who values what they have.

**A person who is not afraid of anything.**

*Innovation distinguishes between  
a leader and a follower..*

— STEVE JOBS

# I N N O V A T I V E

**The goal? To be first.**

Man is a creature with an insatiable hunger for new and better. Yet there are few who bring innovation. There are few experts who are capable of technological or aesthetic breakthroughs and amazing others with something that until recently was impossible.

*Pirnar Ultimum* is a long story on innovations.

Pirnar's was the first to develop a multi-level design for an aluminium door panel. They were the first to reach the respectable thickness of 14 centimetres. They were the first to use a 4-layer glazing that brought with it new aesthetic possibilities. Quadruple sealing is also an innovation of theirs, further adding to better insulation.

After that they headed in another direction and developed a completely flat, perfectly smooth and aesthetically pure door. First.

They were the first to enthuse one of the most renowned European institutes, the German IFT Rosenheim, with a theretofore unattainable thermal conductivity quotient for aluminium entrance doors: 0,73 W/m²K.

Whatever they undertake, they do it in their own special way. From sophisticated LED lighting of the door panel to a built-in fingerprint reader in the handle or even an innovative hidden fingerprint reader.

**The new aim? To surpass even themselves.**

OUTSTANDING INSULATION FACTOR FROM  
**0,73**  
**W/(m²K)**  
IFT ROSENHEIM

*Ultimum* series doors feature one of the lowest aluminium door heat insulation factors in the world. The value 0.73 W/(m²K), a unique achievement for an aluminium front door, was confirmed using an insulation test by the internationally recognised German research institute IFT Rosenheim. *Pirnar* doors are able to achieve such excellent heat insulation results thanks to their technological sophistication, masterful aluminium moulding, careful joining of various materials and high precision manufacturing that aims for perfection. With their superior heat insulation, *Pirnar* doors bring to your home a sense of familiarity and warmth while reducing heat loss at the point in the house or apartment that is the most exposed to heat loss.

# PERFECT

*The only way to discover the limits  
of the possible is to go beyond them  
into the impossible.*

— ARTHUR C. CLARKE

**Good enough? Never.**

What drives a craftsman at Pirnar's to work slowly and precisely, using his skilled hands on the many tiny details of doors? The same inner fire that pushes an athlete to go beyond their limits and set a new record. The same passion that inspires an artist to create beauty that has never been seen before, over and over again. The yearning to reach for the stars, to accomplish the impossible, for perfection.

Whoever does not reach for perfection cannot even attain excellence.

The *Pirnar Ultimium* door is a handmade masterpiece, perfectly shaped and flawlessly crafted in every detail. They are the fruit of bold planning, inspiring design and imaginative realization. Love for perfection is shown in the selection of costly materials, the precision of production, the flawlessness of surfaces and the elegance of lines. Every detail has its own place, and its own special meaning. The abundance of the handcraftsmanship makes possible what no machine can.

We never get tired of perfection. We feel it every time we touch our door. When we leave in the morning, we will be delighted at the sight of the refined lines and colors. The value of the materials and its perfect design will fill us with pride over and over again. We will be able to start the day with ease and a sense of power.

**A day when we can surpass ourselves.**

# PERSONAL

*Follow the crowd and you will  
never be followed by a crowd.*

— HANNAH WHITALL SMITH

**You are unique, and so is your home.**

Every house has a door, but only one opens your home. It says something about you. Whether you like it or not, an entrance tells who you are, how you think, what is important to you. That is why it is so important that it is made according to your wishes and demands. Only if it amazes you will it amaze others, too. Only if you admire it, will the others do the same.

*Pirnar Ultimium* is an entrance you can completely adapt to yourself.

You can have your choice of dimension, your choice style and any of the dozens of designs within that style. You can have your choice of any colour and surface treatment. The dozens of possible combinations among handles, knockers and locks will delight even the most demanding clients.

With discreet LED lighting, your door can shine also at night, not only in the sun. Give it a dash of magic, romance or timeless elegance.

Multi-layer glazing is not only important for the safety and energy efficiency of your home. It represents a special design element where your creativity can come to life. One or two inside layers can have a sand motif, thus playing with the light and covering, yielding extraordinary visual effects. Embedded lenses, crystals, pieces of melted glass, tinted and transparent glass –all of these create a special, unique impression.

**Let your uniqueness show.**

*If you limit your choices only to what seems possible or reasonable, you disconnect yourself from what you truly want.*

— ROBERT FRITZ

# UNCOMPROMISING

**“That is not possible to make.”**

How many times have you heard this in your life? How much feeling of incapacity, despair or anger it caused?

Designers, engineers and handcraftsmen at Pirnar's never ask certain questions, for such questions have no sense. They are not interested if something can be made. They just want to know, how they can do it. When it seems they cannot improve something, they make a step further. When technical solutions look completely dried up, they find a new, even a better one. Uncompromisingly.

Is it possible to make a door with thermal conductivity beyond reach by now, a multiple level door panel or an entrance with all the elements leveled into one surface? Is it possible to make something nobody else has made so far?

At Pirnar's they achieve the goal no matter if it is necessary to use high technology or craftsman hands. Every door is unique, given a final hand touch, perfected from a bold idea to a flawless make. Top certificates and warranties support it. Uncompromisingly.

Every entrance is aesthetically cultivated technical marvel. It inspires architects. It charms beauty admirers. It amazes technologists. It gives joy to the owner. Uncompromisingly.

**Fortunately, handcraftsmen at Pirnar's do not know, something is impossible.**

## ULTIMUM MULTILEVEL

### BASIC SYSTEM

#### MULTILEVEL ADS 125

- ▶ Overall door thickness 125 mm
- ▶ Insulative infill panels 90/125 mm
- ▶ Expanded thermal bridge 40 mm with insulation
- ▶ Multilevel infill implementation (3D-look)

### OPTION

#### MULTILEVEL ADS 140

- ▶ Overall door thickness 140 mm
- ▶ Insulative infill panels 105/140 mm
- ▶ Expanded thermal bridge 40 mm with insulation
- ▶ Multilevel infill implementation (3D-look)

## ULTIMUM PURE

### BASIC SYSTEM

#### PURE 95

- ▶ Overall door thickness 95 mm
- ▶ Insulative infill panels 95 mm
- ▶ Expanded thermal bridge 40 mm with insulation
- ▶ Aligned surface with no visible contacts on frame and leaf outside

### OPTION

#### PURE 110

- ▶ Overall door thickness 110 mm
- ▶ Insulative infill panels 110 mm
- ▶ Expanded thermal bridge 40 mm with insulation
- ▶ Aligned surface with no visible contacts on frame and leaf outside

Possible mismatches between the slots on door leaf and the slots on side parts.

COMFORTABLE

*The greatest pleasure in life is doing  
what people say you cannot do.*

— WALTER BAGEHOT

**Comfort is a reward for success.**

It makes our lives better and more beautiful. It is tenderness, warmth, light, simplicity of life, love, contentment with oneself and others. It is the inner peace and the peace inside our own house. A lot of tiny things.

*Pirnar Ultimum* is the entrance for comfort lovers.

Comfort is to forget about the annoying care for the house keys. You take care of the safety of your home with a single touch of your fingerprint. Your home remains protected and only yours. You decide whom to invite in the house.

Comfort is warmth of your home. The best-isolated aluminium door looks after you, even in a most severe winter you feel cosy as if your loved one embraces you.

Comfort is a friendly and discrete lighting of the entrance where it is most needed. At night, it is easy to spot a doorstep, hold a handle, or see where to put your finger to unlock the door.

Comfort is listening to the words of praise and admiration of your guests and friends when you invite them to the entrance *Pirnar Ultimum*. Comfort is to feel safe. Comfort is to live in fine environment.

**Reward yourself with comfort.**

# MULTI LEVEL

ORIGINAL  
PIRNAR  
DESIGN

## ENTRANCE THAT EVERYBODY NOTICES

*Ultimum Multilevel* is something people would never expect. It is a breakthrough from a limitative flatness into a 3-D world. It is a surprise urging the spectator to come closer and touch a stirred surface. It is a tectonic movement in designing entrance doors. It is innovation achievable only with skilled hand working and top level technology.

*Ultimum Multilevel* is an outstanding and noticeable entrance for people with charisma. It is for the people who are not afraid to speak their opinion and show their own uniqueness. It is for the leaders. The right entrance for you.

### 501

A model of a door for those that stick to the motto "less is more". Horizontal lines on the wider part of the door leaf are rounded off with a vertically positioned rectangular pull handle stretching through the whole door height. As in all the other models, colours can be chosen freely.

Colour FS 7016	Finger scanner

PIRNAR  
DESIGN

## THERE ARE ENTRANCES THAT TAKE YOUR BREATH AWAY

At some entrances people just cannot find the words. You just have to stop for a while every time before entering.

Some entrances make us wish to slide a hand over them. We want to feel them not just see the tiny rifts and an exchange of material.

This is *Ultimum Pure*. Purity of surfaces where nothing defaces the perfect flat surface. An entrance for the most up to date houses and the most demanding admirers of perfection. The one where nothing can be added or taken away. All elements are plunged into unified flat without unnecessary brims and frames. Where everything is one.

*Pure* is a secret. Touch it.

### 612

Astonishing surface made of dark glass reflecting the surrounding and anybody who stands in front of it. Invincible elegance. Subtle purity with two as breath thin lines. Eminent feature with the hidden handle inside the whetted steel band. Perfection.

ESG and inox feature

Discrete LED illumination in handle.

Discrete illumination in pull handle

## 611

Prestige is captured inside the glass and the purity of the form. An entrance with dominating glass surface with or without optional number of grooves. We get an interesting effect when we use them only on some parts.

Side lights LEFT/RIGHT: clear  
glass motive sand-blasted

You do not need much to stand out. A thin longitudinal inox trim extends from top to bottom of the model 616 door leaf like a silk thread. Subtle, but unforgettably distinctive.

## 616

Be individual, have the courage ... Use only one small detail to the greatest effect. The carefully considered position of the pull handle in the slotted aluminium door leaf creates just such an effect.

Discrete threshold illumination

The glass surfaces on the sides are in the same plane as the door leaf and frame.

## 617

Simple elegance where all the elements communicate in harmony. This door with its refine materials, lines and reflections speak of the art of living of their residents. They speak of a joy for life interlaced with a mature responsibility.

## 624

Fine elegance of the door is built on a vertical rift of a handle. We are astonished by the aesthetic power of its vertical line, emphasized by two steel bands. A narrow window inside a handle reveals a construction deliberated to the perfection.
